

For longer life and prosperity.

Your Ultimate Protection Plan

TRAXON™ Gear Oil

TRAXON™ Gear

Let's talk bottom line. Day after day your equipment has to endure extreme operating temperatures, high pressures and heavy loads. Finally, there's a gear oil that protects your equipment better than the leading competitors – Petro-Canada's TRAXON. It's formulated to provide superior wear protection to reduce downtime and maintenance costs. For you, it's the Ultimate Protection Plan.

Start Pure. Finish Strong.

Why is TRAXON better performing than leading competitors? Petro-Canada's TRAXON starts with the HT purity process to produce its 99.9% pure, crystal-clear base oils – among the purest in the world. By removing the impurities that hinder the performance of competitive gear oils, TRAXON retains its “fresh oil” properties longer. Then Petro-Canada blends in specialty additives, giving longer oil life, and better equipment protection.

Exceptional Service

- **Problem-solvers.** Petro-Canada's dedicated technical support and sales team understands the productivity challenges faced by maintenance managers everywhere. Trust Petro-Canada to deliver solutions that are proven to increase productivity and lower operating costs.
- **Proven track record.** Companies around the world depend on Petro-Canada's specialized services including lubrication consolidation, technical leadership and training, best-in-class warranty protection, and local delivery.

Meets or exceeds Industry & OEM specifications

Petro-Canada's TRAXON is designed to meet or exceed the new SAE J2360 Global Standard which means customers around the world can be assured of TRAXON's measurable and recognized quality of performance. TRAXON is even designed to exceed Dana, Meritor, ZF, Mack, Navistar, and Eaton's stringent GL-5/MIL-PRF-2105E gear oil specifications (see specific OEM requirements for further details).

Advanced formula for superior wear protection and performance

Now, you can have the advantage of the superior performance found in TRAXON – Petro-Canada's premium multi-grade line of gear oils. TRAXON's breakthrough formulation is engineered to protect equipment better against wear.

With proof of its longer-lasting fluid and ability to resist shearing better than the leading competitors and industry specifications, TRAXON provides superior wear protection.

- TRAXON's excellent shear stability, as proven by severe shear tests, assures your equipment is protected in even the toughest conditions. This means less downtime and increased profits.
- TRAXON's outstanding ability to resist deterioration and sludging, as proven by oxidation tests, means longer oil life with fewer change-outs and better protection of gears.
- TRAXON is designed to pass stringent gear oil wear tests by meeting or exceeding specifications on five wear parameters including wearing and scoring.

Greater Peace

Petro-Canada's industry leading, No-Nonsense Lubrication

Think of it as continuing protection for both

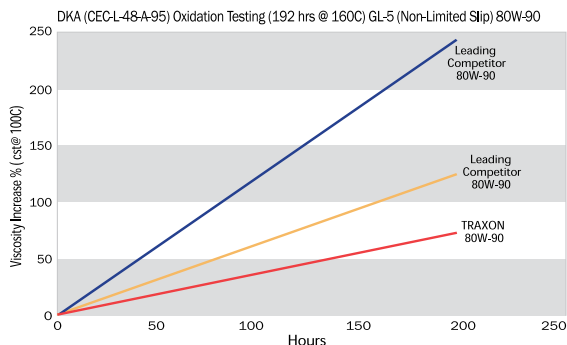

Superior Protection of Your Equipment

Oil has arrived.

TRAXON 80W-90 High Performance Protection

For superior long-lasting wear protection. TRAXON's excellent shear stability and longer oil life vs. leading competitors gives your equipment better wear protection which helps reduce downtime and maintenance costs.

TRAXON 80W-90's longer oil life provides long-lasting protection for your equipment.

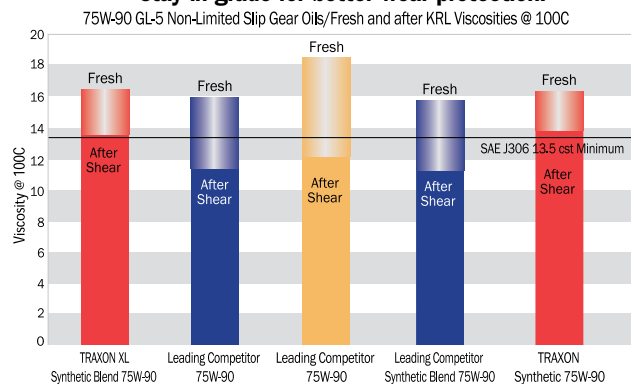

In the DKA oxidation test, product performance is measured by how much harmful viscosity increase will occur over time (therefore the flatter the line the better). As you can clearly see, Petro-Canada's TRAXON, with its advanced formulation, performs better than the leading competitors.

TRAXON XL Synthetic Blend 75W-90 Premium Protection

With TRAXON XL Synthetic Blend you get the same great superior long-lasting wear protection as TRAXON 80W-90 **PLUS** better low temperature protection **AND** more efficient operating performance which can ultimately lead to lower fuel consumption.

TRAXON XL Synthetic Blend and TRAXON Synthetic stay in grade for better wear protection.

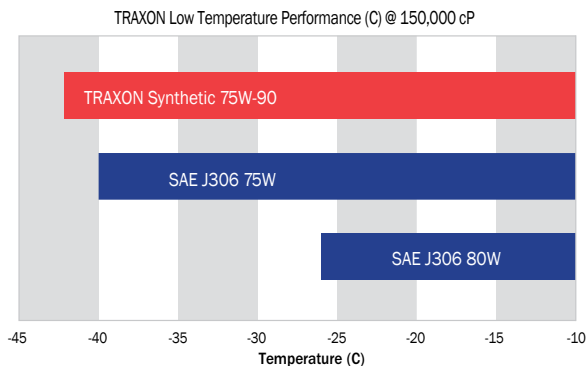

The KRL Shear Test measures the effects of shearing on gear oil. In order to provide an effective barrier of protection for equipment, the after-shear viscosity must be a minimum of 13.5 cst for an SAE 90. Notice how the leading competitors all shear out of grade while both TRAXON XL Synthetic Blend and TRAXON Synthetic exceed the minimum standards.

TRAXON Synthetic 75W-90 Ultimate All Season Protection

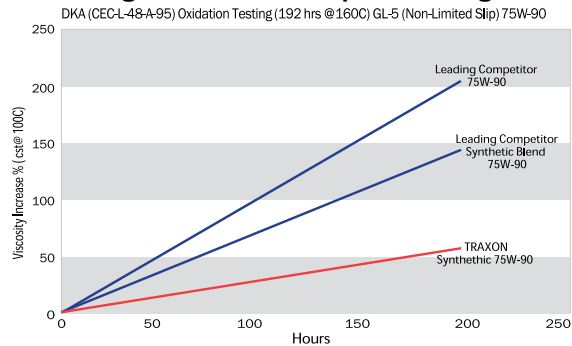

TRAXON Synthetic offers your equipment the same remarkable package as TRAXON XL Synthetic Blend **PLUS** it also provides your gears with outstanding temperature protection in extreme cold weather conditions. This means easier cold weather start ups and shifting, and assurance that your equipment is protected in the most extreme conditions.

For extreme cold temperature protection use TRAXON Synthetic.

TRAXON Synthetic 75W-90 protects your equipment better in extreme cold temperatures than regular 80W oils and exceeds the 75W specification.

TRAXON Synthetic resists oil degradation and sludging for longer oil life and better protection of gears.

In the DKA Oxidation test, product performance is measured by how much harmful viscosity increase will occur over time (therefore, the flatter the line the better). Compared to the leading competitor, Petro-Canada's TRAXON Synthetic, with its advanced formulation, is the clear winner.

TRAXON's strong product line also includes:

- **TRAXON 85W-140 and TRAXON XL Synthetic Blend 80W-140** for situations where tough, high-load, high-operating temperatures are encountered and where a SAE 140 GL-5 gear oil is required.
- **TRAXON E Synthetic** for customers who need to maintain an Eaton/Roadranger "extended warranty"; TRAXON E 75W-90, 80W-140, and CD-50 grades are also available.

For whatever the demands of your operation, TRAXON provides you with the Ultimate Protection Plan for increased productivity, profits and peace-of-mind.

Peace-of-mind.

Warranty is fully behind TRAXON Gear Oil.

For new and older equipment, at no extra cost.

Equipment and Your Bottom Line.

Our No-Nonsense Lubricants Warranty

“Petro-Canada will repair damaged equipment, or replace damaged equipment parts resulting from a failure due to defects of the Petro-Canada lubricant, as long as the lubricant is used in accordance with your equipment manufacturer’s and our recommendations.”

It’s more than just a warranty. It’s a commitment.

Your Ultimate Protection Plan.

Our business is to take your business further.
